### By [Author's Name]

In 1968, I started my career in the information technology industry. At that time, there were very few women working in this field. I was often the only woman in my classes and at my workplace.

Over the past 50 years, I have seen a lot of changes in the industry. I have seen the rise of personal computers, the internet, and cloud computing. I have also seen a change in the number of women working in the field. Today, there are more women than ever before working in IT.

### My Experiences as a Woman in Tech

In this book, I share my experiences as a woman working in the IT industry. I talk about the challenges I have faced, the successes I have achieved, and the lessons I have learned. I hope that my story will inspire other women to pursue careers in IT.

One of the challenges I faced was the lack of role models. When I started out, there were very few women in leadership positions in the IT industry. I often had to look to men for guidance and mentorship.

Another challenge I faced was the perception that women are not as good at math and science as men. This stereotype can make it difficult for women to be taken seriously in the IT industry. I have had to work twice as hard to prove myself and to be recognized for my skills.

Despite the challenges, I have also had many successes in my career. I have worked on a variety of projects, from developing software to managing large IT teams. I have also been recognized for my work with numerous awards.

## **Lessons I Have Learned**

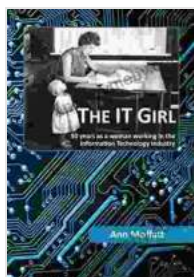

Over the past 50 years, I have learned a lot about the IT industry and about myself. Here are some of the most important lessons I have learned:

- **Don't be afraid to be yourself.** The IT industry is a place where you can be yourself and be successful. Don't try to fit in or be someone you're not.
- **Never give up on your dreams.** No matter what obstacles you face, never give up on your dreams. If you have a passion for something, pursue it.

- **Believe in yourself.** You are capable of anything you set your mind to. Believe in yourself and you will achieve great things.

I hope that my story will inspire you to pursue your dreams and to make a difference in the world. The IT industry is a rewarding and exciting field. If you have a passion for technology, I encourage you to pursue a career in this industry.

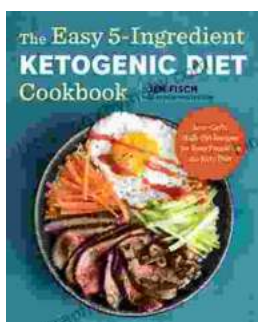

Thank you for reading!
